Subject: Launch of Project GENESIS – Genomics for Elite Sports Integrated System

Dear Sir / Ma'am,

The Athletics Federation of India (AFI) is pleased to announce the launch of **Project GENESIS (Genomics for Elite Sports Integrated System)**, an initiative aimed at optimising athlete performance, health, recovery, and injury prevention through the integration of genomics into high-performance sport.

This initiative has been developed following multiple rounds of detailed discussions with NuGenomics and their scientific team, who are currently working in the field of genomics and its application in sports performance and athlete health. The collaboration aims to bring scientific and personalized approaches to athlete management within Indian athletics.

AFI remains committed to raising the standard of track and field in India and supporting athletes with modern, evidence-based, and ethical scientific practices. To achieve greater international success and enhance athlete health and performance, AFI has decided to move forward with the integration of genomics into the high-performance framework.

This initiative signifies a progressive step towards integrating sports science, sports medicine, and genomics into the high-performance framework of Indian athletics, strengthening AFI's vision for sustained international excellence.

Regards,

G. Srinibas Patnaik
Officiating Secretary
Athletics Federation of India
